

# Global Spy

## Problem

Cryptocurrency hype continues booming with cryptocurrency businesses, new currencies and initial coin offers growing exponentially. The subsequent speed how all this takes place makes it almost impossible for investors to analyse and understand the underlying case: is there an existing company with a management team working for honest purposes? Once these details are well understood by the investor, an investment decision through a comparison of investment opportunities can be made. Thorough research of global business has always been the most important ingredient of success. The tools to analyse and investigate background of persons or companies are not well known. In addition, if they are known they are expensive and they differ from country to country. In general, investors do not have the capacity to conduct detailed and time consuming research. The number of scammers and thieves in the cryptocurrency business makes it very difficult to find safe and profitable investments.

## Solution

Global Spy offers solutions based on crypto currencies and provides the clients with the right level of information on the chosen currency, the initial coin offers or pre-sales. Global Spy offers services starting from the simple Quick Service up to large-scale investigations made by our staff members and based on personal contacts, inquiries and visits. Similarly, we carry out investigations on any business activity using our existing methods and tools, therefore the subject of our assessment is not limited to cryptocurrencies. Forward looking the only payment method we will accept is Spy-tokens. A novelty is the fact that a customer who has received the results of an investigation will financially, and automatically, benefit from the research requested later on by other customers. This type of service is unique in the markets. Compared to similar services currently available on the markets, we can carry out more thorough and faster research of the investigation subjects relying on our experienced investigators and the best tools currently available. Thanks to our toolkits and access rights to many information and data registers we can already today assess for example the business history of companies and their managers, credit information on individuals, their ownership or business links to companies, the owners of internet domains or even which car they have registered under their own or company names. In the end, if the data available does not provide a sufficient level of clarity we may also visit the subjects of our investigations in order to obtain the necessary assurances.

## **Why to invest?**

Global Spy is building a robust investigation platform with completely different approach. Our platform gives you an opportunity to sell your investigation report and earn benefit from information you bought. Our experienced team with long history of investigations can offer reliable reports from companies, ICOs, team members or products for investors to individual person reports to bank industry, exchanges, internet casinos etc.

## **ICO Verification Program**

ICO verification program is one our upcoming product releases to our platform. Verification consist on investigation and complete protection for investors in case where ICO is changed negatively after investigation.

## **Robotics**

After investigation ICO will be on constant monitoring by our robots. For example if whitepaper is changed, our team will be notified immediately. We will contact responsive team members if necessary and ask for reason to change whitepaper.

If reasons are good and investors rights are unchanged, our verification status continues clear. Other cases verification status will be immediately suspended and investors that are using our browser extension are notified.

## **Browser extension for investors**

We will provide browser extension, that verifies the site against our ICO Verification Program database. Browser extension is provided for free to all investors.
